

# 三角形の角度

目標時間	10分
------	-----

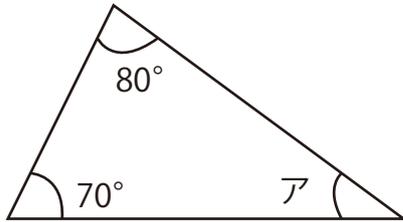

NO. 2

名前

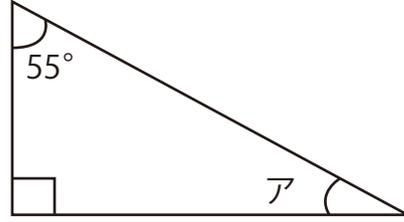

/ 6

◆ 次のアの角度を計算で求めましょう。

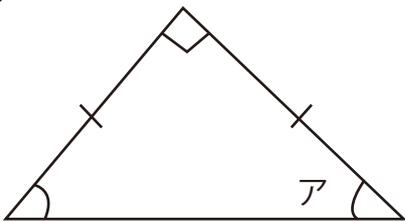

①

②

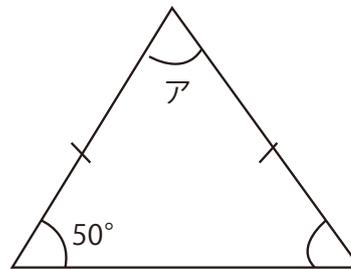

③

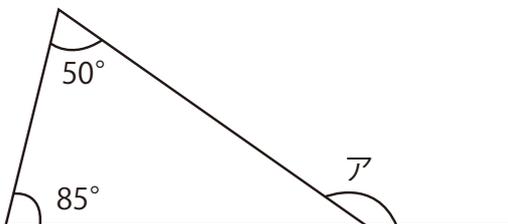

直角二等辺三角形

④

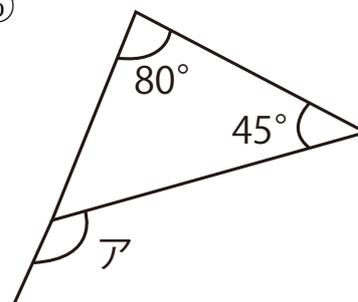

二等辺三角形

⑤

⑥

## 答え

$$\textcircled{1} \quad 180 - ( 80 + 70 ) = 30 \text{ } ^\circ$$

$$\textcircled{2} \quad 180 - ( 90 + 55 ) = 35 \text{ } ^\circ$$

$$\begin{aligned} \textcircled{3} \quad 180 - 90 &= 90 \text{ } ^\circ \\ 90 \div 2 &= 45 \text{ } ^\circ \end{aligned}$$

$$\textcircled{4} \quad 180 - 50 \times 2 = 80 \text{ } ^\circ$$

$$\textcircled{5} \quad 50 + 85 = 135 \text{ } ^\circ$$

$$\textcircled{6} \quad 80 + 45 = 125 \text{ } ^\circ$$
