

三角形の角度

目標時間

10分

NO. 3

名前

/6

◆ 次のアの角度を計算で求めましょう。

①

②

③

④

⑤

⑥

答え

$$\textcircled{1} \quad 180 - (65 + 35) = 80 ^\circ$$

$$\textcircled{2} \quad 180 - (90 + 62) = 28 ^\circ$$

$$\begin{aligned} \textcircled{3} \quad 180 - 70 &= 110 ^\circ \\ 110 \div 2 &= 55 ^\circ \end{aligned}$$

$$\textcircled{4} \quad 180 - 65 \times 2 = 50 ^\circ$$

$$\textcircled{5} \quad 82 + 48 = 130 ^\circ$$

$$\textcircled{6} \quad 96 + 25 = 121 ^\circ$$
