

四角形の角度

目標時間	10分
------	-----

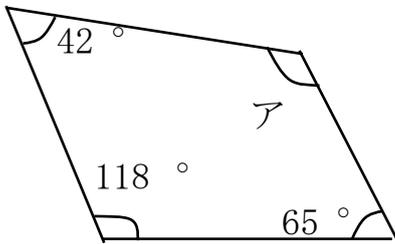

NO. 3

名前

 / 6

◆ 次のアの角度を計算で求めなさい。

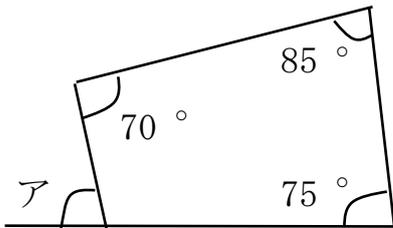

①

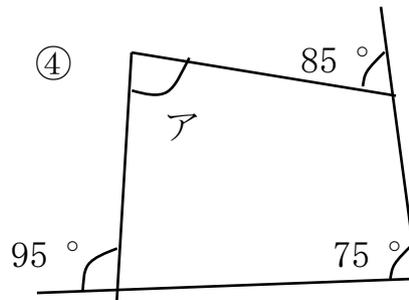

②

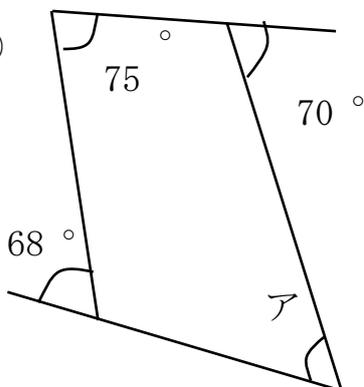

③

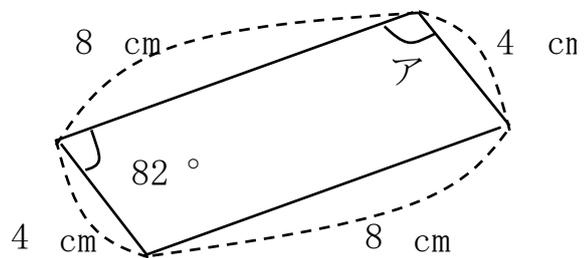

④

⑤

⑥

答え

$$\textcircled{1} \quad 360 - (42 + 118 + 65) = 135^\circ$$

$$\textcircled{2} \quad 360 - (125 + 90 \times 2) = 55^\circ$$

$$\textcircled{3} \quad 360 - (70 + 85 + 75) = 130^\circ$$

$$180 - 130 = 50^\circ$$

$$\textcircled{4} \quad 180 - 85 = 95^\circ$$

$$180 - 95 = 85^\circ$$

$$360 - (95 + 85 + 75) = 105^\circ$$

$$\textcircled{5} \quad 180 - 70 = 110^\circ$$

$$180 - 68 = 112^\circ$$

$$360 - (75 + 112 + 110) = 63^\circ$$

$$\textcircled{6} \quad 180 - 82 = 98^\circ$$
