

面積の単位まとめプリント

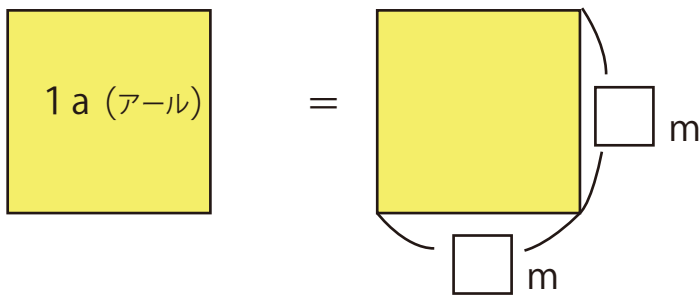

$$1 \text{ m}^2 = (\quad) \text{ cm} \times (\quad) \text{ cm}$$

$$= (\quad) \text{ cm}^2$$

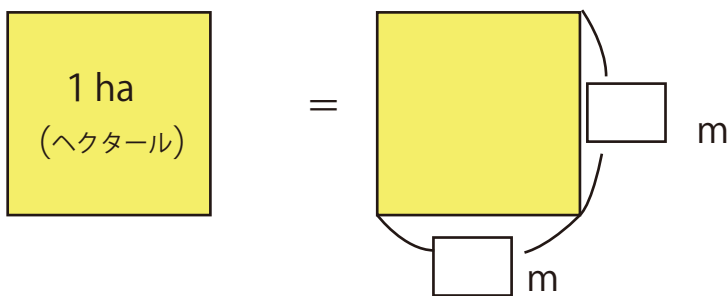

$$1 \text{ km}^2 = (\quad) \text{ m} \times (\quad) \text{ m}$$

$$= (\quad) \text{ m}^2$$

$$1 \text{ a} = (\quad) \text{ m} \times (\quad) \text{ m}$$

$$= (\quad) \text{ m}^2$$

$$1 \text{ ha} = (\quad) \text{ m} \times (\quad) \text{ m}$$

$$= (\quad) \text{ m}^2$$

考えてみましょう

(1) 1ヘクタール (1ha) = () a

(2) $1 \text{ km}^2 = (\quad) \text{ m}^2 = (\quad) \text{ ha} = (\quad) \text{ a}$
